PEI Srl has officially joined the IFAB network as an associated company.

IFAB – International Foundation Big Data and Artificial Intelligence for Human Development – is a research and innovation center dedicated to the development and application of Big Data and Artificial Intelligence for sustainable growth and human development.

The network brings together companies, institutions, and scientific organizations with the aim of fostering collaboration between research and industry and accelerating the adoption of advanced technologies across different economic sectors.

Joining IFAB represents a strategic step for PEI, strengthening its position within a highly innovative ecosystem while promoting synergies, knowledge exchange, and shared projects.

Through this partnership, PEI reaffirms its commitment to technological innovation and the enhancement of skills, actively contributing to the development of data- and AI-based solutions to support the market and its clients.

IFAB also represents an important and valuable reality for the local territory in the fields of research and innovation.

For PEI, which has always been attentive to the development and promotion of local excellence, becoming part of this network is therefore a further source of pride.
